

Sarah Elizabeth Castle PhD

Consultant in Sexual and Reproductive Health

sarah@sarahcastle.co.uk

(0044)7800 872051

www.sarahcastle.co.uk

I am a London-based consultant specializing in demand creation and service provision in relation to sexual and reproductive health and family planning. I have considerable experience with regard to behavior change communication (especially for adolescents), service quality and access as well as health systems strengthening, financing and human resources for health. I have carried out numerous qualitative and quantitative studies, as well as formative research for program design mainly in francophone Africa (but I am happy to work anywhere). My work is innovative, applied and inclusive and aims to build capacity, facilitate local resource generation as well as to contribute to sustainable and effective partnerships.

LinkedIn: <https://www.linkedin.com/in/sarah-castle-13956915/>

Skills

- Formative research for program design.
 - Monitoring and evaluation (via primary data collection and routine data analysis, for example, of DHS, MICS data as well as participatory research to understand the *processes* of change).
 - Country policy and strategy design and evaluation.
 - Proposal writing (including development of Theories of Change, AMELP).
 - Literature reviews.
 - Training (in quantitative and qualitative research methods, participatory research, HCD).
-
